

Can love really be found in Cyberspace?

a look at cyber dating from the viewpoint of a thirty-something, West Indian, Christian woman.

D.S. WHITE INTRODUCES A WORLD OUTSIDE THE PARAMETERS of day-to-day life that exists unbeknownst to most. It has its own language, rules and atmosphere. It offers a freedom that can be addictive, exhilarating, or dangerous for the uninitiated. Packed with information in the author's humorous style it:

- Introduces the Internet lingo;
- Points out common and not so common pitfalls;
- Reviews several sites;
- Provides a comprehensive list of current dating sites;
- Contains interviews of actual online daters;
- Offers bonus introductory chapters of *Age is Just a Number: Adventures in Online Dating (Volume I)*;
- Contains a resource section for sufferers of abuse, rape and mental disorders. (They too inhabit the cyber world).

D.S. WHITE spent years as a reader extraordinaire. The advent of blogging was her catalyst to publication. An unexpected breakup up of a long-term relationship supplied the angst, or muse, if you will, and the healing of her wounded child supplied the purpose of her writing and by association her target audience as well. Dee is proud mother to one daughter.
